sifat26.vercel.app | github.com/sifat26 | linkedin.com/in/sifat26

PROFESSIONAL SUMMARY

Web developer building and shipping production applications. My day-to-day is Angular, React, and Next.js on the frontend, backed by Node.js and Express APIs, and I own deployments through to release. I work across the delivery cycle — component architecture, responsive UI, and API integration. Also a graduate researcher in applied deep learning, with a contribution to an international conference publication.

TECHNICAL SKILLS

- Frontend:** React, Next.js, Angular, JavaScript, TypeScript, Tailwind CSS, Bootstrap, Responsive Design
Backend: Node.js, Express.js, REST APIs, Authentication, Payment Gateway Integration
Databases: MongoDB, MySQL, Firebase
Cloud & Deployment: Vercel, Azure, VPS, IIS Server, cPanel
AI / ML: Python, TensorFlow, Deep Learning, Computer Vision
Developer Tools: Git, GitHub, Postman, Figma, Google Analytics, VS Code

PROFESSIONAL EXPERIENCE

- Web Developer** June 2024 – Present
Universal Technology Research and Development Ltd. (UTRDL) · Bangladesh
- Build and ship Angular and Next.js applications used in live business operations, translating design specs into responsive, accessible interfaces.
 - Develop reusable component libraries that cut duplicate UI work across features and keep the codebase maintainable.
 - Integrate REST APIs end to end, managing data flow, loading and error states, and API contract changes with the backend team.
 - Deploy to IIS Server, configuring builds and resolving environment-specific issues in production.
 - Partner with backend, QA, and product to align technical direction and keep releases moving.
- Full Stack Developer** 2023 – Present
Freelance & Contract · Remote
- Deliver client web applications in three-person teams, contributing across React/Next.js frontends and Express REST APIs (see selected projects below).
 - Build features spanning authentication, product and order management, catalog search, and multi-role dashboards.
 - Configure builds, domains, SEO, and analytics for deployments on cPanel, VPS, and Azure.

PROFESSIONAL CLIENT PROJECTS

Paid production work delivered in three-person development teams. Bullets reflect my individual contributions.

- Bazarica — Multi-Vendor Marketplace** bazarica.com.bd
Role: Full Stack Developer · Tech: Next.js, Node.js, Express
- Built dashboard views for the admin, seller, and customer roles in Next.js.
 - Integrated the payment gateway and order confirmation flow for live transactions.
 - Implemented product and order management against the Express REST API, plus catalog search across vendors.
 - Set up SEO metadata and Google Analytics, and deployed the app on an Azure VPS.
- Atkias Zone — E-Commerce Platform** atkias-zone.vercel.app
Role: Full Stack Developer · Tech: Next.js, Node.js, Express
- Built storefront and product pages in Next.js and connected them to the Express REST API.
 - Implemented user authentication and session handling.

- Set up SEO metadata across product and listing pages, and deployed to a production VPS.

Outfitro — E-Commerce Platform

outfitro.com

Role: Full Stack Developer · Tech: React, Node.js, Express

- Built the storefront and product pages in React and developed REST endpoints on the Express API.
- Modeled and integrated the product and user data layer.
- Implemented authentication and the cart-to-checkout flow, and deployed the app to cPanel hosting.

SELECTED PROJECTS

BlogNest

React, Node.js, Express, MongoDB, Firebase

- Full-stack publishing platform with rich-text authoring, nested comment threads, trending-post ranking, and Google OAuth.
- Designed a comment schema supporting arbitrarily nested replies while keeping MongoDB read queries fast.

Woven Earth

React, Express, MongoDB, Firebase, Tailwind CSS

- Full-stack marketplace for handcrafted textiles, with a self-service artist portal, category-based discovery, and authenticated per-user collections.

PUBLICATION

An IoT-Based Lung Cancer Detection System from CT Images Using Deep Learning

Contributing Author

ITSS-IoE 2025 — International Conference on Intelligent Technology, Systems and Services for the Internet of Everything. University of Wolverhampton, United Kingdom.

Combines IoT infrastructure with deep learning to detect lung cancer from CT images.

EDUCATION

M.Sc. in Information & Communication Technology

2025 – Present

Mawlana Bhashani Science & Technology University

B.Sc. in Information & Communication Technology

2020 – 2025
