TANVIR AHMMED SIFAT

Web Developer · Full Stack Engineer · Applied AI Researcher

+880 1521 565 259 · sifatict26@gmail.com · tanvir-sifat.vercel.app · linkedin.com/in/sifat26 · github.com/sifat26

PROFESSIONAL SUMMARY

Web developer with 2+ years of professional experience translating business requirements into responsive, production-ready web applications using Angular, React, and Next.js, backed by Node.js / Express REST APIs. Contributed across multiple production platforms, including Bazarica, a live multi-vendor marketplace with payment integration. Completing an M.Sc. in ICT at MBSTU with three co-authored, peer-reviewed publications in applied deep learning and medical imaging.

TECHNICAL SKILLS

Frontend: Angular, React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Sass/SCSS, Tailwind CSS, Bootstrap, Angular Material, Material UI

Backend & APIs: Node.js, Express.js, REST API Design & Integration, Authentication, JWT, CRUD, Payment Gateway Integration

Databases & State: MongoDB, MySQL, Firebase, Redux Toolkit, Context API

Deployment & Cloud: IIS Server, Azure VPS, VPS, cPanel, Vercel

Developer Tools: Git, GitHub, VS Code, Postman, Figma, Google Analytics

AI / ML Research: Python, TensorFlow, Keras, Deep Learning, Computer Vision, Medical Image Analysis

PROFESSIONAL EXPERIENCE

Web Developer

Jun 2024 – Present

Universal Technology Research and Development Ltd. · Remote / Bangladesh · Full-time

- Translate evolving business requirements into responsive frontend features and workflow updates across client applications in mortgage finance, commercial real estate, and venture capital using Angular and Next.js.
- Build and maintain client-facing portals including mortgage broker dashboards with loan calculation tools, multi-step application forms, and document upload features; and real estate platforms with interactive map search and location filtering.
- Integrate REST APIs end to end — managing data contracts, request validation, loading and error states, and coordinating contract updates with the backend team as application logic evolves.
- Develop and maintain reusable UI component libraries with TypeScript to enforce design consistency across modules, and manage production IIS Server builds and deployments.

Full Stack Developer

2024 – Present

Freelance & Contract · Remote

- Collaborated in small developer teams to deliver three paid client web platforms, building React / Next.js frontends and Node.js / Express REST APIs for authentication, product catalogs, and order workflows.
- Configured and supported production deployments across Azure VPS, cPanel, and Vercel, including custom domain setup, SEO metadata, and Google Analytics integration.

SELECTED PROJECTS

Bazarica — Multi-Vendor Marketplace bazarica.com.bd

Next.js · React · Redux · Node.js · Express · MongoDB · Azure VPS

- Contributed to a live multi-vendor marketplace where independent sellers manage their own product listings and orders independently, while platform admins review vendor accounts, manage commission structures, and oversee operations.
- Implemented payment gateway integration and order confirmation flows, along with role-based dashboards for admins, sellers, and buyers, cross-vendor catalog search, SEO metadata, and production deployment on Azure VPS.

Kahf Treasure — Attar & Fragrance E-Commerce kahf-treasure.vercel.app

Next.js · React · Redux Toolkit · Tailwind CSS · Express · MongoDB · Cloudinary

- Full-stack boutique fragrance e-commerce platform featuring a dynamic product catalog with variant pricing, responsive cart drawer, and Cloudinary media optimization.
- Engineered centralized client cart and session state using Redux Toolkit, backed by an Express REST API and MongoDB data persistence layer.

Nirnoy — EdTech MCQ Assessment Platform **nirnoy.vercel.app** *React · Node.js · Express.js · MongoDB · Tailwind CSS · Zod*

- Engineered a server-authoritative examination flow where question delivery, countdown timing, and scoring are enforced backend-side — stripping correct answers prior to client delivery to eliminate client-side answer inspection.
- Implemented Zod schema validation across all submission routes, with attempt tracking, score calculation, per-exam leaderboards, and an admin JSON exam importer in MongoDB.

Outfitro — E-Commerce Platform **outfitro.com** *React · Node.js · Express · MongoDB · Sass/SCSS · cPanel*

- Contributed to a full-stack fashion platform in a three-member client team: developed storefront pages, product catalog views, Express REST endpoints, and modeled MongoDB product/user schemas.
- Implemented user authentication and cart-to-checkout flows; managed production build deployment on cPanel hosting.

EDUCATION

M.Sc. in Information & Communication Technology *2025 – Present*

Mawlana Bhashani Science & Technology University, Tangail · *In progress*

Research focus: applied deep learning for medical imaging, computer vision, and network security.

B.Sc. in Information & Communication Technology *2020 – 2025*

Mawlana Bhashani Science & Technology University, Tangail · **CGPA 3.65 / 4.00**

Coursework: software engineering, data structures, algorithms, computer networks, database systems.

RESEARCH PUBLICATIONS (CO-AUTHOR · ALL 2025)

1. Detection and Classification of Kidney Disease from CT Images: An Automated Deep Learning Approach

Technologies (MDPI), Vol. 13, Issue 11, Article 508 (2025) · DOI: 10.3390/technologies13110508

DenseNet121 / EfficientNetB0 soft-voting ensemble for automated kidney disease classification from CT images; reported 99.24% diagnostic accuracy.

2. An IoT-Based Lung Cancer Detection System from CT Images Using Deep Learning

Springer Nature · ITSS-IoE 2025, University of Wolverhampton, UK (2025) · DOI: 10.1007/978-981-92-3681-7_14

ResNet152V2 and InceptionV3 with a hybrid channel-spatial attention (HCSA) module; reported 98% classification accuracy on benchmark lung CT dataset.

3. Classification of Kidney Disease from CT Images: A Deep Learning-Based Comparative Analysis

IEEE ICSECS 2025, Pekan, Malaysia (2025) · DOI: 10.1109/ICSECS65227.2025.11279151

Comparative deep learning analysis on 12,447 CT images combining ensemble classifiers with explainable AI (XAI); reported 98.98% accuracy and 98.60% F1-score.
